This flowchart represents a program that generates a random number, then if the number is less than 100, it will output that it was less than 100. If the number is more than 100, it will output that the number is more than 100.

Start

Generate a number 1, 100

if number is less than 100

if number is more than 100

Output "Generated a number less than 100"

Output "Generated a number more than 100"

End
